The partner experience

Jaree Club
for partners

Offer benefits to investors and startups, with clear controls for publication, redemption and reporting.

A concept in development. Interfaces and operational examples are illustrative.

02 / About Jaree

Jaree. A selected investment and business community.

A Saudi platform connecting accredited, high-net-worth investors with high-potential startups to explore investment opportunities and build business relationships.

180

investors admitted

1,000+

investor applications

Membership is by admission, following eligibility and identity checks.

Source: Jaree partnership deck.

High-net-worth investors

Accredited investors selected by Jaree following eligibility, identity and financial-standing checks.

High-potential startups

High-potential startups connecting with qualified investors to explore investment opportunities.

03 / Partner value

Why partner with Jaree Club?

Introduce your benefits to a focused audience and build your brand’s presence within the Jaree community.

01

A focused audience

A trusted investor community, including high-net-worth individuals, alongside startups seeking services that support their growth.

02

Visibility on Jaree’s website

Your brand and approved benefits appear in Jaree Club, with offer details, redemption instructions and your links.

03

Special placement for distinctive benefits

Partners offering distinctive benefits may receive featured placement within Jaree Club, based on the benefit’s value and relevance to members.

Your brand in the member experience

Your brand appears alongside approved benefits, with content explaining their value and how to redeem them. Standout benefits may receive featured placement.

Featured placement

Space for your team and ideas

Notion

Regus

Space to work and meet

Regus

Hilton

Hospitality for members

Hilton

Illustrative examples only. These brands are not announced partners, and the benefits are not real offers.

04 / Membership

Membership and eligibility

Membership is linked to an approved Jaree account. Partners choose the audience for each benefit: investors, startups or both.

Startups

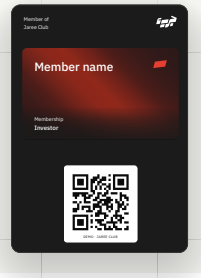

Membership held by a company representative, with benefits for business needs.

Investors

Services, experiences and benefits relevant to their work and interests.

Checking a card does not automatically record a redemption.

Member account

Members find their card, eligible benefits and redemption terms in their account.

05 / Application and launch

From application to publication

Apply to partner with Jaree, review and sign the agreement, then prepare your benefit for publication review.

1 Apply

Add your organisation and benefit idea. Review suggestions from your website or a document.

Organisation name
Ofuq Workspace

Industry
Coworking

Proposed benefit
One free coworking day each month

Help me fill this in

2 Review terms

Accept the terms or propose additions, edits or removals in the same application.

Example clause amendment

Original wording
The benefit applies at all locations.

Agreed wording
The benefit applies at the Riyadh location with a reservation.

3 Sign the agreement

The partner signs first, then Jaree signs the same version. Both receive one final PDF.

Signature drawing area

Draw here

Try signing in the presentation

4 Set up and publish

A signed or verified existing agreement opens setup. Preview and submit the benefit for publication.

Benefit editor

Ofuq Workspace

One free coworking day each month

For investors and startups

Book your visit and show your Club card when you arrive.

A signed agreement opens setup. Members can see the benefit once its publication request is approved.

06 / Redemption options

Redemption that suits your business

Define where members redeem a benefit, what they present and how the use is confirmed.

	Online	In person	Service or experience
Example	Notion A digital subscription for members	Regus Two days at a workspace	Hilton A hospitality experience for members
The member presents	Individual code	Membership card	Jaree voucher
Where it is checked	In the partner's system If integration is enabled	On Jaree's verification page	On Jaree's verification page
Usage limit	One use	Two days	One use

Code options

A shared code, individual codes supplied by the partner, Jaree vouchers, or codes issued by the partner's system.

Defined by the partner

Audience · Dates · Usage limits · Terms

Illustrative examples only. These brands are not announced partners, and the benefits are not real offers.

07 / Verification and confirmation

Verification and redemption

Benefit details may be public. Eligible members obtain codes under the benefit's terms.

01

Check eligibility

Check eligibility first. No redemption is recorded at this stage.

02

Confirm redemption

The remaining allowance and activity record have been updated.

03

Already recorded

The same result is returned without recording another use.

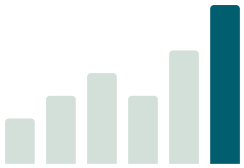

Use verification or individual codes with suitable controls. A shared code alone does not prevent forwarding.

08 / Monitoring and control

Monitoring and control

Track views, codes issued and confirmed redemptions separately.

Benefit activity — Illustrative figures

Codes issued	Confirmed redemptions	Available codes	
48	24	72	
Given to members, not counted as uses	Recorded only after confirmation	Ready for new members	

Clear measurement

Issuing or showing a code does not count as a confirmed redemption.

Privacy-aware reporting

Activity reports omit names; verification data is limited to authorised checks.

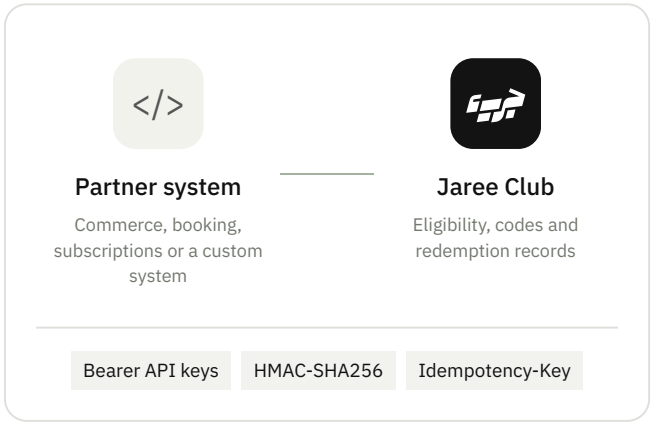

Benefit controls

Submit content changes for review and pause new claims when needed.

09 / Integration

Integration that fits your business

Your system connects to Jaree through an API to check eligibility, record redemptions or issue codes on demand.

Scoped access

An API key for checks only, or checks and confirmation. Keep it on your server; revoke it when needed.

Test before activation

Test the integration for your chosen redemption method before submitting the benefit for review.

Track each operation

See the outcome of each request. If the connection fails, retry the same request without counting another redemption.

Code options and integration requirements. Upload existing codes by CSV or connect your system to issue them on demand. You can also use Jaree's verification page without an integration. Setup depends on your system; this presentation does not include ready-made commerce connectors.

10 / Integration operations

How your system works with Jaree

Three operations: check eligibility, confirm redemption and issue codes on demand.

Check eligibility

Your system → Jaree → Your system

The member presents their card or code. Your system checks eligibility and the available allowance with Jaree, without recording a use.

01	02	03
Card or code	Check with Jaree	Eligibility result

The result is preliminary. Apply the benefit only after redemption is confirmed.

`POST /codes/check`

Confirm redemption

Your system → Jaree → Activity

Before completing the transaction, your system asks Jaree to confirm redemption. Once confirmed, the benefit can be applied and one use is recorded.

01	02	03
Request confirmation	Confirmation succeeds	Complete transaction

If confirmation is refused, do not apply the benefit. Retrying the same request does not mean another redemption.

`POST /uses · Idempotency-Key`

Issue a code from your system

Jaree → Your system → Jaree

When a member requests their code in Jaree, Jaree retrieves it from your system and displays it in their account.

01	02	03
Member request	Your system issues	Code appears in Jaree

If Jaree repeats the request, your system returns the same code for the member.

`HTTPS · HMAC-SHA256`

Receiving or viewing a code is not a redemption. A use is recorded on confirmation.

For your technical team: request and response examples in the interactive presentation.
